The Nobelity Project
bridging gaps in education at home and abroad

We build critically needed educational infrastructure, support literacy and scholarship, and promote conservation and community connection for over 15,000 students every year.

Working with partners in East Africa, Latin America and the U.S., we are increasing access to education, improving quality of learning and creating connections to the world we all share.

Thank you for your support of what we do. We are seeing positive outcomes for these communities as we all work toward a more peaceful and sustainable world.
